Green Hills of Africa - Ernest Hemingway 2014-05-22
There are some things which cannot be learned quickly, and time, which is all we have, must be paid heavily for their acquiring. They are the very simplest things, and because it takes a man's life to know them the little new that each man gets from life is very costly and the only heritage he has to leave. In the winter of 1933, Ernest Hemingway and his wife Pauline set out on a two-month safari in the big-game country of East Africa, camping out on the great Serengeti Plain at the foot of magnificent Mount Kilimanjaro. “I had quite a trip,” the author told his friend Philip Percival, with characteristic understatement. Green Hills of Africa is Hemingway's account of that expedition, of what it taught him about Africa and himself. Richly evocative of the region's natural beauty, tremendously alive to its character, culture, and customs, and pregnant with a hard-won wisdom gained from the extraordinary situations it describes, it is widely held to be one of the twentieth century's classic travelogues.

Geography and Genealogy - Jeanne Kay Guelke 2016-04-22
Genealogy has become a widely popular pursuit, as millions of people now research their family history, trace their forebears, attend family reunions and travel to ancestral home sites. Geographers have much to contribute to the serious study of the family history phenomenon. Land records, maps and even GIS are increasingly used by genealogical investigators. As a cultural practice, it encompasses peoples' emotional attachments to ancestral places and is widely manifest on the ground as personal heritage travel. Family history research also has significant potential to challenge accepted geographical views of migration, ethnicity, socio-economic class and place-based identities. This volume is possibly the first ever book to address the geographical and scholarly aspects of this increasingly popular social phenomenon. It highlights tools and information sources used by geographers and their application to family history research. Furthermore, it examines family history as a socio-cultural practice, including the activities of tourism, archival research and DNA testing.

Royal Challenge Accepted - Alistair Boyd 2006

Sustainability - Suzanne Benn 2021-09-30
The heightening impact of ecological and societal crises makes sustainability an increasingly urgent imperative, requiring a fundamental shift in how we understand and practice management and business. In this book, the authors set out the key characteristics of sustainability such as its temporal and multilevel effects and highlight the complex array of sustainability risks and opportunities for business and
management. Setting business within a systems perspective, the authors outline different sustainability discourses that frame how business responds to the sustainability imperative. They call for the normative and scientific approaches to sustainability to be merged so that a new transdisciplinary approach that brings together the material and relational traditions in sustainability management is developed. Sustainability work is understood as the reframing of tools, technologies, practices and business strategies to respond to the imperative. The book concludes by highlighting dynamic features of the imperative as it is shaped by the urgent need to restore and regenerate social and ecological systems. Sustainability transitions such as the Circular Economy and Net Zero are suggested as inspiration for profound business transformation. By facing the intractable complexity associated with sustainability, this book challenges students and scholars to draw from across the sciences and social sciences to understand, reflect upon and deliver responsible business outcomes in contemporary society.

Challenge Accepted! - Parven Kaur 2022-02-15
Help Your Kids Unplug and Challenge Their Creativity with Fun Things To Do! (Ages 6-8) "Parven Kaur is a mom and writer who focuses on Internet safety and digital literacy. Her blog, Kids N Clicks offers sound conditions, wages, and hours. The Michigan miners were unsuccessful in their struggles with mine owners, which came to a climax in the 1913-14 Copper Country Strike. This nine-month battle between workers represented by the Western Federation of Miners (WFM) and the three major mining companies in the region took a particularly nasty turn on Christmas Eve, 1913, at a party for strikers and their families organized by the WFM. As many as 500 people were in the Italian Benevolent Society hall in Calumet, Michigan, when someone reportedly shouted "fire." There was no fire, but it is estimated that 73-79 people, more than 60 of them children, died in the stampede for the exit. Against this dramatic backdrop, Gary Kaunonen tells the story of Finnish immigrants to Copper Country. By examining the written record and material culture of Finnish immigrant proletarians-analyzing buildings, cultural institutions, and publications of the socialist-unionist media—Kaunonen adds a new depth to our understanding of the time and place, the events and a people.

Cohen 2009-01-13 Last year, more African Americans were reported with AIDS than any other racial or ethnic group. And while African Americans make up only 13 percent of the U.S. population, they account for more than 55 percent of all newly diagnosed HIV infections. These alarming developments have caused reactions ranging from profound grief to extreme anger in African-American communities, yet the organized political reaction has remained remarkably restrained. The Boundaries of Blackness is the first full-scale exploration of the social, political, and cultural impact of AIDS on the African-American community. Informed by interviews with activists, ministers, public officials, and people with AIDS, Cathy Cohen unflinchingly brings to light how the epidemic fractured, rather than united, the black community. She traces how the disease separated
blacks along different fault lines and analyzes the ensuing struggles and debates. More broadly, Cohen analyzes how other cross-cutting issues—of class, gender, and sexuality—challenge accepted ideas of who belongs in the community. Such issues, she predicts, will increasingly occupy the political agendas of black organizations and institutions and can lead to either greater inclusiveness or further divisiveness. The Boundaries of Blackness, by examining the response of a changing community to an issue laced with stigma, has much to teach us about oppression, resistance, and marginalization. It also offers valuable insight into how the politics of the African-American community—and other marginal groups—will evolve in the twenty-first century.

Activist Literacies - Jennifer Nish 2022-11-03

A groundbreaking rhetorical framework for the study of transnational digital activism What does it mean when we call a movement "global"? How can we engage with digital activism without Jennifer Nish "slacktivists"? In Activist Literacies, Jennifer Nish responds to these questions and a larger problem in contemporary public discourse: many discussions and analyses of digital and transnational activism rely on inaccurate language and inadequate frameworks. Drawing on transnational feminist theory and rhetorical analysis, Nish formulates a robust set of tools for nuanced engagement with activist rhetorics. Nish applies her literacies of positionality, orientation, and circulation to case studies that highlight grassroots activism, well-resourced nonprofits, and a decentralized social media challenge; in so doing, she illustrates the complex power dynamics at work in each scenario and demonstrates how activist literacies can be used to understand and engage with efforts to contribute to social change. Written in an accessible, engaging style, Activist Literacies invites scholars, students, and activists to read activist rhetoric that engages with "global" concerns and circulates transnationally via social media.

All That Happened At Number 26 - Denise Scott 2011-09-25

All that Happened at number 26 now has a brand new cover with candid photos of Denise on the front. 'I'll never forget the first time John and I saw number 26. We just knew it was going to be ours. It was so awful and ugly and repulsive in every way, not to mention the fact that it was located in a suburb I had sworn I'd rather die than live in, that we knew we had a great chance of getting it.' And so Denise Scott moved into number 26, with a husband, his circus equipment, a king-sized futon (but not a base), a Ventolin inhaler (to cope with stress-induced asthma), no savings to speak of and their newborn baby. The husband lost his eyebrows; the circus equipment multiplied, spilling over into any
available space; the futon went mouldy; the Ventolin ran out; and another baby was added to the family, putting paid to any ideas of further savings. Forget about future plans, it was enough just to make it through the day. All lives have their hiccups, though, and this is no misery memoir - far from it. The life that Denise and her husband John created in their ramshackle house is one of warmth, humour and good old-fashioned ingenuity. When the roof leaked, the kids wore raincoats. When the kids developed eczema, Denise devised a menu consisting entirely of adzuki beans. And when the council dismantled play equipment at the local park, John built a cubby house with it - so what if it was sprayed with arsenic? It's not as if the kids were going to lick the walls. Written with Denise's trademark candour, is part memoir, part stand-up, this book is completely beguiling. Showing exactly what it takes to hold it all together when you want to follow your career dreams, maintain the love in a marriage, bring up kids who will get up off the couch, and look after an ageing parent - all while retaining a healthy sense of self-doubt - this book is a heartwarmer for anyone.

Challenge Accepted! - Ochan Kusuma-Powell 2018-11-27
In the past, international schools have responded to challenging
behaviors in punitive ways. Consequences for specific infractions (cheating, stealing, etc.) are outlined in policy manuals and punishments are meted out accordingly. While the punishments outlined in policy facilitate efficiency and consistency in making decisions, this approach may not provide the best learning opportunities for the offending student or for the school. Behavior is influenced by a number of variables, including physiological considerations, upbringing, cultural influences, prior experiences and emotional state, among others; and students may need different responses to support the development of behavior that is more acceptable in a school setting. In this monograph, NFI recommends a more compassionate approach to managing behavioral challenges in international schools.

Rethinking School: How to Take Charge of Your Child's Education - Susan Wise Bauer 2018-01-09

"If you read only one book on educating children, this should be the book.... With a warm, informative voice, Bauer gives you the knowledge that will help you flex the educational model to meet the needs of your child." —San Francisco Book Review Our K–12 school system isn’t a good fit for all—or even most—students. It prioritizes a single way of understanding the world over all others, pushes children into a rigid set of grades with little regard for individual maturity, and slaps “disability” labels on differences in learning style. Caught in this system, far too many young learners end up discouraged. This informed, compassionate, and practical guidebook will show you how to take control of your child’s K–12 experience and negotiate the school system in a way that nurtures your child’s mind, emotions, and spirit. Understand why we have twelve grades, and why we match them to ages. Evaluate your child’s maturity, and determine how to use that knowledge to your advantage. Find out what subject areas we study in school, why they exist—and how to tinker with them. Discover what learning disabilities and intellectual giftedness are, how they can overlap, how to recognize them, and how those labels can help (or hinder) you. Work effectively with your child’s teachers, tutors, and coaches. Learn to teach important subjects yourself. Challenge accepted ideas about homework and standardized testing.

Help your child develop a vision for the future. Reclaim your families’ priorities (including time for eating together, playing, imagining, traveling, and, yes, sleeping!). Plan for college—or apprenticeships. Consider out-of-the-box alternatives.
